

Advanced Web-Based Business Intelligence Dashboard and Reporting System

Accurate information is the single most valuable asset for driving profits. Business users do not want to wait for information. Information needs to be accurate and provided in real-time.

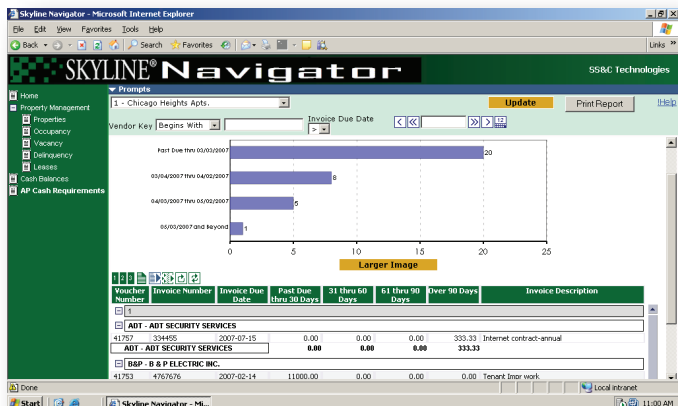

FEATURES

- Powerful Web-Based SKYLINE Navigator System retrieves, organizes, analyzes and presents real-time financial and operating details any time and from anywhere
- Instantly surveys, monitors and filters large volumes of property management data and details providing a “snapshot” of information critical to all levels of your operation
- Easy-to-use informational dashboard provides a magnified view on details of operations and cash flow reporting... analyze performance, revenue and operations from a single screen
- Instantly converts operational and financial data into filtered reports and graphs
- Provides up-to-date and accurate information on the key performance indicators (KPI) that affect your business
- Quickly drill-down & drill-into detailed information

BENEFITS

- Real-time informational tool to exploit the real-time flow of the business for better business decisions and improved performance
- Enhances communications...real-time information can be printed or exported into an e-mail format
- Provides information on where your business has been, where it currently is and where it is headed
- Provides speed and efficiency that exceed the demands of tenants and investors
- Perform continuous due diligence on your holdings and investments for true competitive advantage
